SOFTWARE FOR SAFEGUARDING

So what is Safeguard Cloud?

Offering a top level overview of all violations across a single or multi-site setup, Senso is able to deliver unparalleled insight into a users actions and behaviors.

THE BENEFITS

✔ **Multi-school Reporting**
Report across one or more schools centrally, with role based access rights.

✔ **Read Only Logs**
Secure read only logs to ensure the integrity of your data in the Azure cloud.

✔ **Monitor and Manage Devices**
Monitor and protect your devices wherever they are in the world.

✔ **Streamlined Options**
Streamlined options for easy management to allow the review of violations to be slick and seamless.

✔ **Keywords Lists**
Developed in collaboration with experts and leading charities.

✔ **Roles Based Access Rights**
Take control of what your users can and can't access.

SAFEGUARDING FEATURES

✔ **Ban Resources**
Quickly and easily block access to resources such as websites or website content.

✔ **Lock Screen**
The lock screen feature can be used as a broadcast system to alert users on many or all devices with a custom message such as "Fire - Please Evacuate".

✔ **Violation Logs**
Designed to allow the review of violations to be slick and seamless.

✔ **Dashboard**
With a top-level overview of all violations across a single or multiple site setup, Senso can deliver unparalleled insight into the users' actions and behavior.

✔ **Application Logs**
Register and capture the applications hash, allowing for a ban to stay banned.

✔ **Activity Logs**
User activity is captured from log on to shut down.

✔ **AI Visual Threat Detection**
Helps prioritize violations where potentially harmful content is displayed.
